GASMONITOR GAS DETECTION SYSTEM

16 channel

GAS-MONITOR-PANEL
GasMonitor gas detection system - Part numbers coming soon, contact us for more information

- Clear LCD indication
- System status button to aid with fault finding
- IP65 rated
- Selectable relay latching function

PRODUCT DESCRIPTION

The Flamefast GasMonitor is a low cost high specification 16 channel gas detection panel designed for use with the Flamefast Gas Sensor range.

Any combination of sensors from the FGS range can be connected by simply wiring in parallel, cutting down on installation costs. The communication interface allows all of the sensor information to be displayed on the panel, this includes gas type, concentration status, alarms and calibration data.

The relay outputs allow the unit to be connected to external systems or alarm beacons and the latching and failsafe facilities combined with the additional device interfaces offer the flexibility to cover any application.

Key features:

- 16 Channel Monitor
- Clear LCD indication
- Auto-reset following power failure
- Fire Alarm test bypass timer
- 24VDC auxillary power output to power up to 4-6 Flamefast Gas Sensors dependent on sensor type. External power supply required for additional.
- Additional Interfaces for: Thermal Links; Ventilation Systems; Remote Emergency Stop Buttons; Fire Alarm Systems
- System status button to aid with fault finding
- Alarm 1, Alarm 2 and Fault relays
- Selectable relay latching function
- 5 year warranty
- UK manufactured

Please refer to the datasheet under 'downloads' for part numbers and/or technical data, we are working on getting all part numbers and technical data on the website as soon as possible.
