GAS SENSOR WITH BACNET INTERFACE

GAS SENSOR
Gas Sensors with BACnet interface - Part numbers coming soon, contact us for more information

- Traffic light LCD read out
- Volt Free Contact output
- IP40 rated
- Latching function with reset input

PRODUCT DESCRIPTION

The Flamefast Gas Sensor is one of the most cost effective and versatile units available on the market. With a Voltage Output, and Volt Free Contract the Flamefast Gas Sensor can connect directly into most third party controllers or can easily connect to the new LCD based range of panels using BACnet output.

With most modern buildings the plant room safety systems are BMS integrated, and the Flamefast Gas Sensor has been designed with this in mind. It can be treated like any other field sensor, the latching facility allows direct integration with the primary safety circuit, then simply pulse the Digital Input to reset once the alarm has cleared. This negates the requirement for a controller, cutting down cost of the equipment and installation.

Key features:

- 24V AC/DC Power Supply
- Pre-calibrated
- Traffic Light LCD read out
- Volt Free Contact output
- BACnet Interface (16 Address)
- Latching function with Rset Input
- Analogue output
- Touch button setup and calibration
- Calibration and "End of Life" Reminder
- Oxygen Sensor monitors for Enrichment and Depletion as standard
- Mounts onto any standard Single Gang Junction Box or Conduit Box
- UK Manufactured

Please refer to the datasheet under 'downloads' for part numbers and/or technical data, we are working on getting all part numbers and technical data on the website as soon as possible.
