

## MIDWEST OPTICAL - BANDPASSFILTER BP850

F/BP850-C

Bandpassfilter - standard, 850nm, for C-Mount

- IR bandpass
- Work area 800-1000 nm
- For high intensity IR LED

### Product description

Midwest Optical Systems bandpass filters are ideal for use in combination with LED or laser diode lighting. The filter consists of a precision polished glass filter with an anti-reflex coating. They are more rugged, thinner, less angular and have a very high transmission compared to conventional filters. Use of the band-pass filter enhances contrast and often undesirable effects of disturbing light from the surroundings are eliminated.

### Specifications

Filter thread (thread diameter x pitch)

C-Mount
