

MIDWEST OPTICAL - BN595

F/BN595-95

Bandpassfilter - narrow, 595nm, for 95 mm thread

- Orange bandpassfilter
- Work area 570-615 nm
- For orange LED and fluorescence

Product description

Midwest Optical Systems bandpass filters are ideal for use in combination with LED or laser diode lighting. These filters consist of a precision polished glass filter with an anti-reflex coated surface. They are more rough, thinner, less angular and have a much higher transmission than conventional filters. Use of bandpass filters improves the contrast and often eliminates unwanted effects of disturbing ambient lighting.

Specifications

Filter thread (thread diameter x pitch)

95
