

MIDWEST OPTICAL NARROW BANDPASS BN850

F/BN850-C

Bandpassfilter - narrow, 850nm, for C-Mount

- Near-IR bandpass filter
- Work area 840-865 nm

Product description

Midwest Optical Systems bandpass filters are ideal for use in combination with LED or laser diode lighting. These filters consist of a precision polished glass filter with an anti-reflex coated surface. They are more rough, thinner, less angular and have a much higher transmission than conventional filters. Use of bandpass filters improves the contrast and often eliminates unwanted effects of disturbing ambient lighting.

Specifications

Filter thread (thread diameter x pitch)
