

KDS- BS BRUSH ENTRY SYSTEM

29000.4

KDS-BS 6/10 BRUSH FRAME SCREW

- Fast, tool-free cable routing Pass multiple cables through instantly without cutting, drilling or fitting individual grommets.
- Effective dust and debris protection Brush sealing helps maintain a clean internal environment inside the enclosure.
- Perfect for frequent changes Easily add, move or remove cables — ideal for panels that evolve over time.

PRODUCT DESCRIPTION

The KDS-BS Brush Entry System is designed for installers who want a clean, flexible way to route multiple cables into a panel without cutting grommets or using messy makeshift solutions. The brush insert allows cables to pass through easily while maintaining a protective barrier against dust, dirt and debris.

Here's the thing — it saves time. You can add or remove cables without tools, without dismantling anything and without compromising the enclosure's internal cleanliness. It's ideal for control panels, switchgear, automation cabinets and any environment where cables enter from below or behind the enclosure.

SPECIFICATIONS

Color	Black
Country of origin	DE
Diameter of the screw holes	5.5
Fixing screws	M5
Flamklass	V-0
Glass-fibre reinforced	Yes
Halogen free	Yes
Height	25.8
Installed height	11
Length	100
Length of cutout	68.5
Number of screw holes	4
Operating temperature from	-40
Operating temperature to	90

Pack Size	1
Silicone-free	Yes
Tariff code	39259020
Torque of the fixing screws	3
Width	70
Width of cutout	36
