2A TWO HOLE CABLE CLEAT (ALUMINIUM)

2A-07N
2 Hole Aluminium Cable Cleat 35mm-46mm

- Strong LM6 aluminium construction for long service life
- Wide range of cable diameter sizes available (approx. 38 mm – 168 mm)
- Optional neoprene liner for added cable protection (suffix “L” in part number)
- Optional epoxy coating for enhanced corrosion resistance

PRODUCT DESCRIPTION

The **2A Two-Hole Cable Clamp (Aluminium)** from Ellis Patents is engineered to deliver strong retention and security for single cable installations. Manufactured from die-cast LM6 aluminium and tested to IEC 61914 standards (Cable cleats for electrical installations), it's built to handle both mechanical strain and fault conditions like short circuits. **Neoprene liners** can be added for vibration and abrasion protection, and **epoxy coating** is available for corrosion resistance in challenging environments such as offshore or marine settings.
