EMPEROR ™ CABLE CLEAT (STAINLESS STEEL)

ES37-45
Emperor Cable Cleat 37mm-45mm

- 316L stainless steel construction
- Suitable for single and trefoil cable formations
- Optional polymer liner to protect cables from vibration and abrasion
- Two-bolt fixing system for secure installation
- Performs in fire, extreme temperatures, and harsh environments

PRODUCT DESCRIPTION

The **Ellis Emperor™ Cable Cleat (Stainless Steel)** is the ultimate choice for securing cables in the most demanding environments. Manufactured from high-strength **316L stainless steel**, these cleats provide unrivalled resistance to extreme mechanical forces, corrosion, and fire conditions.
Specifically designed for single or trefoil cable installations, the Emperor™ cleat is **tested to IEC 61914** and proven to withstand the highest levels of short-circuit fault conditions. Its two-bolt fixing and low smoke, halogen-free polymer liner (optional) ensure both cable protection and operator safety.

Ideal for power stations, substations, offshore, and industrial applications, the Emperor™ sets the benchmark for cable cleat reliability.
