

SLIMLINE PRO

850300001

KG8503-230V-RAL7035 350W SLIMLINE PRO

- High Cooling Capacity Designed for demanding industrial environments requiring reliable heat management.
- Slim, Space-Efficient Design Maximises usable space within control panels and enclosures.
- Indoor & Outdoor Application Suitable for a wide range of industrial and environmental conditions.

PRODUCT DESCRIPTION

The **Seifert SLIMLINE PRO cooling units** are high-performance enclosure cooling solutions designed for industrial applications where reliability and efficiency are critical. Built with a **robust slimline design**, these units provide powerful cooling while optimising space within electrical enclosures and control panels.

Suitable for both **indoor and outdoor environments**, the SLIMLINE PRO range ensures consistent temperature control, protecting sensitive electrical and electronic components from overheating. Its advanced cooling technology delivers efficient heat dissipation, making it ideal for demanding applications in automation, switchgear, and industrial systems.

SPECIFICATIONS

12406_Refrigerant / GWP	R 513A / 630
Approvals	CE, cRUus, cULus
Color House	Grey RAL 7035
Cooling capacity L35L35	350 W
Cooling capacity L35L50	200 W
Current L35L35	1.5
Dimensions	600 x 250 x 135 (45+90) mm
Fuse size	15 A (T)
IP Class Housing	IP55
Max current	1.7
Nominal power L35L35	310 W
Operating temperature range	10°C - 55°C
Power Max	370
Product series	Slimline Pro
Setting range	+25°C...+50°C (pre set +35°C)
Starting Current	4

System air flow ambient/cabinet	200 / 122 m ³ /h
Unimpeded air flow ambient/cabinet	408 / 180 m ³ /h
Weight	13.7
Voltage	230 V
