

## POWERLINE QC CONNECTORS 500A PANEL DRAIN

PP-E-GRN-M5

500A Panel Drain Earth Green Thread Post

- Clean panel integration: purpose-built for professional switchboard mounting.
- Fast energisation: plug in external power without rewiring terminals.
- Reduced maintenance: solid contacts mean fewer hot joints.

### PRODUCT DESCRIPTION

The ten47 500A Panel Drain QC Connector is designed for secure mounting into switchboards and power distribution panels, providing a reliable outlet for high-current connections. Built for permanent installations, it creates a clean, professional interface between fixed equipment and temporary or mobile power systems.

Engineered for low contact resistance and strong mechanical stability, the Panel Drain maintains consistent performance even under heavy electrical load and frequent connection cycles. The quick-connect format allows technicians to energise equipment rapidly without complex cabling changes.

This connector is widely used in generator changeover panels, site distribution boards, industrial machinery, and event power systems where safety, speed, and durability matter.
