

POWERLINE QC CONNECTORS 500A LINE DRAIN

CP-E-GRN-S50-S

500A Line Drain Earth Green, 50sq

- Speed on site: Connect or isolate a 500A line in seconds without complex tooling.
- Built to be abused: Designed for construction, utilities, and events where equipment takes real punishment.
- Safer by design: Positive locking and touch-safe construction reduce risk during live work.

Product description

The ten47 500A Line Drain QC Connector is built for fast, secure connection and isolation on temporary and permanent power distribution systems. Designed for high-current applications, it delivers dependable performance in demanding industrial and construction environments where downtime isn't an option.

The rugged housing and precision contact design ensure low resistance, minimal heat build-up, and consistent power transfer. With a quick-connect mechanism, installation and removal are straightforward, reducing labour time while maintaining a safe, locked connection.

Ideal for generators, site power, events, utilities, and heavy industrial equipment, this connector is engineered to handle real-world conditions—dust, vibration, and frequent connect/disconnect cycles.
