

POWERLINE QC CONNECTORS 500A LINE SOURCE

CS-E-GRN-C240-OS

750A Line Source Earth Green

- 500A continuous rating for demanding power applications
- Quick connect mechanism for fast installation and maintenance
- Low resistance contacts to limit heat build-up

Product description

ten47 Powerline QC Connectors – 500A Line Source

The ten47 500A Line Source QC Connector is engineered for safe, high-current power delivery in industrial and temporary distribution systems. Built as the supply connection within the ten47 QC range, it provides a secure, low-resistance link between generators, switchgear, and downstream equipment.

The connector combines a tough, impact-resistant body with precision contacts to maintain stable performance under heavy electrical loads. Its quick-connect design allows technicians to make or break connections rapidly, cutting installation time while keeping safety front and centre.

From construction sites and event power to utilities and manufacturing plants, this connector is designed to handle vibration, weather exposure, and frequent use without compromising reliability.
