

POWERLINE QC CONNECTORS 500A PANEL SOURCE

PS-L2-BLK-M5

500A Panel Source Phase 1 Black

- Professional panel interface: no loose tails or improvised connections.
- Rapid changeover: connect external power without opening the board.
- Reliability first: solid contacts reduce heat and nuisance faults.

PRODUCT DESCRIPTION

The ten47 500A Panel Source QC Connector provides a secure, panel-mounted supply connection for high-current power distribution systems. Designed for integration into switchgear, generator changeover panels, and fixed equipment, it creates a dependable interface between permanent installations and external power feeds.

Built for continuous heavy-duty use, the connector delivers low resistance power transfer with strong mechanical stability. The quick-connect format allows technicians to connect generators or temporary supplies in seconds, without disturbing internal panel wiring.

Engineered for industrial environments, the Panel Source connector withstands vibration, heat, and frequent mating cycles while maintaining a safe, locked connection every time.
