

ENERGY METERS - DIN MOUNTED MID CERTIFIED

AP251DO

MID Multi Funct Meter 1Phase Direct Conn

- MID certified — legally compliant for billing and financial energy settlement
- Single and three-phase variants — covers residential, commercial, and light industrial use
- Direct and CT connect options — flexible for different current ratings and installations
- DIN rail format — compact, easy to install in distribution boards and meter panels
- EU and UK compliant — meets Measuring Instruments Directive requirements

PRODUCT DESCRIPTION

Sifam Tinsley MID certified DIN rail energy meters provide legally traceable energy measurement for billing, tenant sub-metering, and landlord-tenant applications where metrological accuracy is a regulatory requirement. The range covers single-phase direct connect and three-phase direct and CT connect variants, ensuring compatibility across a broad range of residential, commercial, and light industrial installations. MID (Measuring Instruments Directive) certification confirms compliance with EU and UK legal metrology standards, making these meters suitable for use in any application where energy data is used for financial settlement.
