PANEL ENERGY METERS & CT'S MULTI-FUNCTION ENERGY METERS

ND30-11200U1
Sifam Multi Function Energy Meter

- Class 1 accuracy
- Modbus RTU communication
- Supports 1Ø & 3Ø systems
- Measures kW, kVA, PF
- Compact, space-saving design

PRODUCT DESCRIPTION

Sifam Tinsley Digital Multi-Function Energy Meters

The Sifam Tinsley range of digital multi-function energy meters delivers accurate, real-time monitoring of key electrical parameters—making them ideal for energy management, load analysis, and system diagnostics.

Designed for both single and three-phase systems, these meters measure voltage, current, power factor, active/reactive/apparent power, and total energy consumption. They're widely used in industrial panels, commercial buildings, and utility environments where reliable data is essential.

Key features include:

- Bright LED/LCD display for easy readability
- Class 1 accuracy (per IEC standards)
- DIN rail or panel mounting options
- Modbus RTU communication for seamless integration
- Configurable alarms and demand monitoring

Whether you're installing new panels or retrofitting existing ones, Sifam Tinsley's multi-function meters help you stay in control of your energy usage—efficiently and affordably.
