

CABLES - RJ12

RJ12CABLE-2SW
RJ12 2METER CABLE

- Plug-and-play connection — eliminates traditional terminal block wiring
- 2m and 3m options — suits different panel sizes and meter-to-CT distances
- Reduces installation time — faster commissioning compared to conventional wiring
- Minimises wiring errors — secure RJ12 connector locks out incorrect connections

PRODUCT DESCRIPTION

Sifam Tinsley RJ12 Easywire cables provide the quick-connect links between DIN rail energy meters and current transformers, eliminating the need for traditional terminal block wiring. Available in 2 metre and 3 metre lengths to suit different panel sizes and layouts, they are designed specifically for use with the Sifam Tinsley Easywire metering system — reducing installation time, minimising wiring errors, and keeping panels neat and organised.
