

CURRENT TRANSFORMER - 3 PHASE BLOCK 25MM CENTRES

XN25-185031S000000
3 phase CT 100/5A

- Integrated 3 phase block — all three phases measured from a single compact unit
- 25mm aperture — space-efficient design for tight panel and distribution board installations
- 5A secondary output — compatible with standard panel-mounted energy meters and analysers
- 100A and 160A primary ratings — covers light industrial and commercial metering requirements

PRODUCT DESCRIPTION

Sifam Tinsley 3 phase block current transformers with 25mm centres provide accurate three-phase current measurement for panel-mounted energy meters and power analysers. With a 5A secondary output and 25mm aperture, these compact block CTs are suited to new panel builds and retrofit installations where space is at a premium. Available in 100A and 160A primary ratings, they offer a straightforward solution for three-phase metering in light industrial, commercial, and distribution board applications.
