ENERGY METERS PANEL MOUNTED

AP15-P5CO
96x96mm Multifunction Meter c/w Pulse/Mo

- 96x96mm format — fits standard panel cutouts, ideal for retrofit and new build
- Easywire technology — plug-and-play wiring reduces installation time significantly
- Modbus & pulse output — integrates with BMS, SCADA, and energy management systems
- Profinet option — for advanced industrial network communication
- AC and DC supply variants — 20–60V DC and 85–253V AC models available

PRODUCT DESCRIPTION

Sifam Tinsley panel-mounted energy meters offer accurate multifunction power measurement in a compact 96x96mm format, suitable for standard panel cutouts. The range includes Modbus and pulse output variants for BMS and SCADA integration, Easywire models for fast and error-free installation, and Profinet-enabled network meters for advanced industrial communication. With AC and DC supply options spanning 20V DC to 253V AC, the range covers a broad spectrum of panel building and power monitoring applications.
