

## CURRENT TRANSFORMER - SPLIT CORE XS03 120X80MM WINDOW

XS03-395131S000000

Omega 10C 1000A/5A 0.333V (333mV)

- Large 120x80mm Window – Ideal for busbars and heavy cable installations
- Split Core (Hinged) Design – Enables installation without system shutdown
- Perfect for Retrofit Projects – Reduces downtime and simplifies upgrades
- Class 0.5 Accuracy – Reliable precision for energy monitoring and billing

### PRODUCT DESCRIPTION

The XS03 Split Core Current Transformer is engineered for **fast installation and high-current retrofit applications**. With a **large 120x80mm window**, it is designed to accommodate substantial busbars and multiple cable runs in industrial and commercial electrical systems.

Its **split core (hinged) construction** allows installation without disconnecting existing conductors, making it ideal for upgrades, maintenance, or energy monitoring projects where downtime must be minimised.

Delivering **Class 0.5 accuracy**, the XS03 ensures dependable and precise current measurement for energy monitoring, metering, and power management systems. It integrates easily with standard metering devices, making it a versatile solution for panel builders, OEMs, and electrical contractors.
