

CURRENT TRANSFORMER - SPLIT CORE XS02 50X80MM WINDOW

XS02-375105S000000

OMEGA 10B Split Core CT,800/5A,Class 0.5

- Split Core Design – Quick installation without disconnecting cables
- 50x80mm Window Size – Suitable for busbars and large cable runs
- Ideal for Retrofit Projects – Minimises downtime in existing systems
- Class 0.5 Accuracy – Reliable precision for energy monitoring and metering

PRODUCT DESCRIPTION

The XS02 Split Core Current Transformer is designed for **fast and hassle-free installation**, making it the perfect solution for retrofit and upgrade projects. With a **50x80mm window size**, this CT easily accommodates busbars and large cable configurations in existing electrical systems.

The **split core (hinged) design** allows the transformer to be installed without disconnecting the primary conductor, significantly reducing downtime during installation. This makes it particularly useful in live environments where system interruption must be minimised.

Engineered with **Class 0.5 accuracy**, the XS02 ensures precise current measurement for energy monitoring, metering, and power analysis. It is compatible with standard metering devices, providing a reliable solution for panel builders, energy managers, and electrical contractors.
