

BATTERY POWERED LUG CRIMPERS - TOOLS

EK30IDML

Battery Hydraulic Crimping tool 6-120 sq

- No need for mains power or manual force
- Suitable for large-diameter cables
- Compatible with multiple lug types and sizes
- Reduces installation time significantly
- Comfortable grip for long working periods

PRODUCT DESCRIPTION

Klauke battery powered lug crimpers combine high-performance cordless technology with precision engineering for secure, consistent crimping of cable lugs and terminals. Designed for professional electricians, industrial technicians, and utility installers, these tools deliver powerful crimps without the strain of manual operation.

Featuring interchangeable dies, ergonomic handling, and long-lasting rechargeable batteries, Klauke cordless crimpers are ideal for heavy-duty applications in power distribution, panel building, and maintenance work. Their robust construction ensures durability, even in demanding site conditions.
