

LUG CRIMPERS DIES

HNF4SET

Set Of 6 To 150Sq Dies For Ek354MI

- Matches various cable and lug specifications
- Withstands high crimping forces
- Quick changeover for minimal downtime

PRODUCT DESCRIPTION

Lug crimper dies are precision-engineered inserts designed to fit into manual, hydraulic, and battery-powered crimping tools, enabling secure, consistent crimping of cable lugs and terminals. Available in a variety of sizes, these dies match specific cable cross-sections to ensure the correct compression force for optimal electrical conductivity.

Our range includes replacement dies for popular crimping tool brands, including Klauke, Iwiss, and Greenlee, as well as universal fit options. Each die is manufactured from high-grade hardened steel for durability and long service life in demanding environments.
