

## IWISS LUG CRIMPER

HS1016

Copper Lug Hand Crimper 1.5-16Sq

- Ideal for large cables and industrial applications
- Delivers secure, consistent terminations
- Comfortable use with reduced fatigue
- Compatible with various lug sizes

### Product description

The Iwiss Lug Crimper is a robust hand tool designed for secure and efficient crimping of cable lugs and terminals. Built for professional electricians, industrial technicians, and maintenance teams, it delivers consistent, high-strength terminations that ensure optimal electrical conductivity. Featuring precision-engineered crimping jaws and an ergonomic handle design, the Iwiss Lug Crimper makes heavy-duty crimping easier and more reliable. Suitable for a wide range of cable sizes, it's an essential tool for panel building, power distribution, and field service work.
