

## INTERCHANGEABLE DIES FOR EK50

S502

Cutting Die For EK50

- Designed specifically for EK50 multi-tools
- Long service life under regular use
- Uniform crimping results every time
- Suitable for industrial and commercial use
- Swap dies easily without extra tools

### Product description

The S502 interchangeable dies are designed for use with the EK50 multi-tool, enabling precise crimping of specific connector types and sizes. Made from high-grade steel, these dies deliver consistent compression and a secure mechanical bond, ensuring optimal electrical conductivity.

Easily swapped without tools, the S502 dies allow electricians, panel builders, and maintenance teams to adapt the EK50 for different applications, maximising versatility and productivity.
