

CUTTERS AND RJ45 RJ11 CRIMPER

K1051

26mm Cable Cutter C/W Telescopic Handles

- Sharp hardened steel blades for clean cuts
- Suitable for copper and aluminium cables
- Compatible with RJ45 (CAT5e/CAT6) and RJ11 connectors
- Precision jaws for consistent terminations

Product description

Cable cutters are essential tools for electricians, technicians, and installers, providing clean, accurate cuts for a wide range of electrical wires and cables. Designed for professional use, these cutters feature hardened steel blades for long-lasting sharpness and ergonomic handles for comfortable grip during extended work.

Whether you're preparing cables for crimping, stripping, or termination, our cutters deliver reliable performance and precise results every time.

The RJ45 & RJ11 crimper is designed for fast, secure termination of Ethernet and telephone cables. Suitable for CAT5e, CAT6, and RJ11 connectors, this tool ensures strong, reliable crimps that meet professional installation standards.

Featuring precision-machined crimping jaws, integrated cable stripper, and cutter, it's an all-in-one solution for data and telecom engineers. Ergonomic grips and a durable frame make it ideal for frequent use on-site or in workshops.
