

GG/GL NH FUSE LINKS 800V AC

385210

FUSE NHC1 gG 25A 800 VAC

- gG/gL Full-Range Protection – Covers both overload and short-circuit conditions
- 800V AC Rated – Suitable for higher voltage industrial applications
- High Breaking Capacity – Ensures safe fault interruption
- NH Standard Compatibility – Easy installation in existing fuse systems

PRODUCT DESCRIPTION

The **DF Electric gG/gL NH Fuse Links 800V AC** are designed for **comprehensive protection of electrical systems**, offering both overload and short-circuit protection in high-voltage environments. These fuse links are suitable for **industrial, commercial, and infrastructure applications** where increased system voltages require enhanced reliability and safety. Manufactured to high-quality standards, these fuse links deliver **excellent breaking capacity and fault protection**, ensuring safe disconnection under extreme electrical conditions. Their robust construction and consistent performance make them ideal for use in **switchgear, motor protection, and power distribution systems**.

Designed to fit **standard NH fuse bases**, they allow seamless installation and integration into existing systems.

SPECIFICATIONS

Breaking Capacity	80
Operational Temperature	-40-80
Pack Size	3
Rated Current	25
Tariff code	85361050
Type	gG NHC1
Voltage AC max	800
Weight	270
