CYLINDRICAL FUSE HOLDERS

PMX, PMC, PMF, BAC

485121
Fuse holder PM X 10x38 3P+N (3 module) "Integral neutral"

- Wide Range
- 25A to 125A
- Enclosed or open options
- UL Approved
- European manufacture

PRODUCT DESCRIPTION

DF Electric have developed fuse holders which include the neutral pole within 1 module and the same applies to 3 pole +neutral fuse holders which come in a 3 module or 4 module option. Fuse holders offer a multitude of benefits for machine builders and panel builders, ensuring reliable and efficient circuit protection in their projects. Firstly, fuse holders provide a convenient and secure solution for installing and replacing fuses in machines and panels. The holders are designed to securely hold the fuses in place, preventing accidental disconnections and ensuring proper electrical contact. This ease of installation and replacement saves valuable time for machine builders and panel builders, allowing for quick maintenance and minimizing downtime Furthermore, fuse holders offer enhanced safety for both the machines and the operators. In the event of an overcurrent or short circuit, the fuse holder acts as a barrier, isolating the fault and preventing further damage to the equipment. This protection not only safeguards the machines from potential electrical faults but also ensures the safety of the operators by reducing the risk of electrical hazards. Fuse holders provide machine builders and panel builders with the advantages of easy installation and replacement, enhanced safety, increased equipment longevity, and flexibility.

SPECIFICATIONS

4853_Size (mm)	10x38
Rated Current	32
Voltage AC max	690
Voltage DC max	750
Indicator	No
Number of poles	3 + N
Width/number of modules	3

IP Class	IP20
Standards	UL4248-1, CSA C22.2 Nº 4248-1, IEC/EN60269-2, IEC/EN 60269-1
Approvals	CSA, cRUus, IEC, Lloyd´s, Rina

Tariff code	8536105090
Country	ES
Weight	167
