

5X20MM SLOW BLOW

522511

Fuse Glass Body 5x20 250mA Slow Blow

- Time-delay (Slow Blow) characteristic
- Standard 5x20mm format
- Prevents nuisance tripping during start-up
- Ideal for transformers and power supplies
- Current ratings from 250mA to 10A

PRODUCT DESCRIPTION

ESKA 5x20mm Slow Blow Glass Fuses are time-delay fuse links designed to withstand temporary inrush currents while still providing reliable protection against sustained overloads and short circuits. Ideal for transformers, motors, power supplies, and equipment with high start-up currents.
