PRODUCT DESCRIPTION

Bussmann BS88 Offset Bolted Tag Fuses

Bussmann BS88 offset bolted tag fuses provide reliable low-voltage circuit protection for industrial, commercial and panel-building applications. The offset bolted tag design supports secure installation in compatible fuse holders, switchgear and distribution equipment.

Available in current ratings from 2A to 32A, the NITD range is suitable for electrical protection in control panels, machine systems, isolators and industrial electrical installations. These fuses are commonly used by electrical contractors, OEMs, panel builders and maintenance engineers.

Demesne Electrical supplies Bussmann BS88 offset bolted tag fuses across Ireland, supporting customers with dependable fuse protection products for electrical systems and replacement requirements.
