

ALUMINIUM ISOLATORS

KEA363UYR

Isolator Enclosed Aluminium 80A AC21 3P

- Corrosion-Resistant Aluminium Enclosure
- Reliable Electrical Isolation
- High IP Protection
- Built for Harsh Environments
- Wide Range of Configurations

PRODUCT DESCRIPTION

Katko Aluminium Isolators are designed to deliver safe and dependable electrical isolation in demanding industrial, commercial, and outdoor applications. Manufactured from high-quality cast aluminium, these enclosed isolators offer exceptional corrosion resistance and mechanical strength, making them ideal for environments exposed to moisture, chemicals, UV radiation, and challenging weather conditions.

Suitable for use in manufacturing facilities, renewable energy installations, marine environments, water treatment plants, HVAC systems, and infrastructure projects, Katko Aluminium Isolators are available in a variety of current ratings and enclosure configurations to suit diverse operational requirements. Their durable construction and high ingress protection ratings help safeguard electrical components against dust and water ingress, ensuring reliable operation even in harsh conditions.
