

ENCLOSED SWITCH FUSE

KVKET 3125 T6

Switch Fuse Enclosed 125A AC23 3P+N 395

- Ratings from 125A to 400A
- Sheet-steel and polycarbonate enclosures
- NH/DIN and BS fuse options
- Switching and fuse protection combined
- Suitable for industrial installations

PRODUCT DESCRIPTION

Katko enclosed switch fuses combine electrical switching and fuse protection within a protective enclosure. They provide a complete solution for industrial, commercial and power-distribution installations where an enclosed assembly is required.

The Demesne range includes three-pole NH/DIN and BS switch fuses from 125A to 400A. Available enclosure materials include painted sheet steel and polycarbonate, providing options for different installation environments.

When selecting an enclosed switch fuse, check the current rating, fuse system, number of poles, enclosure material, IP rating, cable-entry requirements and utilisation category.
