

LOAD BREAK SWITCHES 200A-800A

KU4630LVK228LKX150

4P 630A AC23/AC21 C/W H/Shaft 48372

- High Current Capacity
- Safe Load Switching
- Heavy-Duty Construction
- Versatile Industrial Applications
- Reliable Power Isolation

PRODUCT DESCRIPTION

Katko Load Break Switches 200A–800A are engineered to provide safe, reliable switching and isolation of high-current electrical circuits across a wide range of industrial, commercial, and infrastructure applications. Designed to operate under load, these heavy-duty switches enable operators to safely disconnect power while maintaining the integrity of electrical systems.

Manufactured to the highest quality standards, Katko Load Break Switches feature robust construction and are designed to withstand demanding operating conditions. Available in current ratings from 200A to 800A, they are suitable for use in main distribution boards, motor control centres, switchgear, renewable energy installations, manufacturing facilities, and utility applications.

With dependable switching performance, excellent mechanical durability, and compliance with international safety standards, Katko Load Break Switches help maximise operational safety while supporting efficient maintenance and system reliability.
