

VOLTAGE MONITORING RELAYS

E1PF400VSY01

Voltage Monitor 3 Ph 1 C/O Phase Failure

- Broad range of SKUs — covers most common application requirements from stock
- Compact DIN rail format — easy to integrate into new or existing panels
- 1 or 2 changeover outputs — flexible for different panel and control circuit needs
- Phase failure detection across the full range — protects motors and equipment from costly damage
- Wide voltage coverage — 24V DC to 480V AC, single and three-phase

PRODUCT DESCRIPTION

Telehase voltage monitoring relays provide reliable phase and supply protection for both single and three-phase systems. The range covers phase failure detection, overvoltage and undervoltage monitoring, and asymmetry protection — with 1 or 2 changeover output options to suit varying panel configurations. Voltage ranges span standard 230V single phase through to 480V three-phase, making the range suitable for a wide variety of industrial and commercial installations across Ireland and the UK.
