

TEMPERATURE MONITORING RELAYS

E3TF01 230VAC

Temperature Monitor 1 C/O 230v AC

- Over and undertemperature protection — guards equipment against thermal damage
- Wide voltage range — 24–240V AC/DC on G2TFK02, no separate PSU required
- 1 or 2 changeover outputs — flexible for different control circuit needs
- IN rail mounted — easy panel integration
- Compatible with standard temperature sensors — simple to commission

PRODUCT DESCRIPTION

Telehase temperature monitoring relays provide accurate over and undertemperature protection for industrial processes, machinery, and HVAC systems. The range offers single and dual changeover output options with wide voltage compatibility — from 230V AC fixed supply up to 24–240V AC/DC — making them adaptable across a broad range of panel and process control applications. Compatible with standard NTC/PTC temperature sensors for straightforward installation.
