

## TIMING RELAYS

E1Z110(12-240VAC.DC)

Timer Cyclic 1 C/O 12-240v AC/DC

- Up to 10 selectable timing functions — one relay covers multiple application needs
- Wide voltage range — 12–240V AC/DC throughout the range, AC and DC compatible
- Cyclic and star-delta variants — dedicated models for motor and sequence control
- 1 or 2 changeover outputs — suits simple and complex control circuit requirements
- 11-pin octal socket option — drop-in replacement for standard relay bases

### PRODUCT DESCRIPTION

Telehase timing relays offer precise and flexible time control for a wide range of industrial automation and control panel applications. The range spans multifunction, cyclic, star-delta, and dedicated timer variants — with 4, 7, and 10 selectable timing functions available depending on the model. Wide supply voltage compatibility from 12V DC to 240V AC/DC across the range means a single relay can cover multiple circuit types, reducing the need for separate stock. Single and dual changeover output options, plus 11-pin octal socket variants, ensure compatibility with most standard panel layouts and relay bases.
