

CURRENT MONITORING RELAYS

E1IM10AAACL10 230VA

Current Monit 1Ph 10A Multifunc 230V AC

- Wide current range — 5A, 10A, and 100A variants to suit different load types
- Wide supply voltage — 24–240V AC/DC compatibility reduces stocking complexity
- Multifunction operation — overcurrent, undercurrent, and window function in one unit
- 1 or 2 changeover outputs — flexible output configuration for panel design
- Compact DIN rail mounting — easy to install alongside other Telehase relays

PRODUCT DESCRIPTION

Telehase current monitoring relays offer reliable overcurrent and undercurrent protection for single-phase applications across a wide supply voltage range. The range includes multifunction units covering 5A, 10A, and 100A thresholds, with wide voltage compatibility from 24V DC up to 240V AC — making them suitable for pumps, motors, conveyor systems, and general industrial load monitoring. With 1 or 2 changeover outputs available, they integrate cleanly into standard control panel layouts on DIN rail.
