# CABLE SLEEVING EARTH

GPS2GREEN/YELLOW
Cable Sleeving.PVC 2mm Earth

- Available in a range of diameters (1.5mm² to 16mm² and beyond)
- Typically rated for -15°C to +70°C
- Offers protection from accidental contact and wear
- Widely used in lighting circuits, distribution boards, and earthing systems

PRODUCT DESCRIPTION

**CABLE SLEEVING – EARTH (GREEN/YELLOW)**

Earth cable sleeving is used to clearly identify and insulate earth conductors in electrical wiring systems. The green/yellow colour coding complies with international standards and ensures safe, consistent identification across all installations.

Ideal for domestic, commercial, and industrial use—whether you're rewiring a socket, building control panels, or installing new equipment.
