BUTT CRIMPS

V70SV007001
Crimps Insulated Red Butt 1.5mm (Pack 100)

- Works with all standard crimping tools
- Typically rated for 300V applications
- Colour-coded for easy wire size matching (Red, Blue, Yellow)
- Up to 105°C (PVC), 125°C (Nylon)
- Suitable for 0.5–6.0 mm² copper wires

PRODUCT DESCRIPTION

Butt crimps are designed to connect two wires end-to-end, providing a secure and insulated electrical connection. Commonly used in control panels, machinery wiring, automotive, and general industrial applications, they ensure conductivity and mechanical strength in one simple step.

Available in insulated (PVC, Nylon) and non-insulated types, with colour-coded options to match wire sizes. Suitable for copper conductors and compatible with standard crimping tools.
