

This installation sheet must be kept for future use.

**PLEASE NOTE**

- This product must be installed, connected and used in compliance with prevailing standards and/or installation regulations.
- Disconnect all power supply before installing and uninstalling.

# 1 Installing

## ⚠ ⚠ DANGER

**HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH**

- Install this product in accordance with National Wiring Regulation.
- Check compatibility with earthing system. Do not use this product on installations which require double pole switching eg. IT or TT systems.
- Do not use iC60H RCBO PoN as an incomer device.
- Do not plug iC60H RCBO PoN into former Acti9 ISOBAR.

**Failure to follow these instructions will result in death or serious injury.**

All electrical equipment protected by iC60H RCBO PoN must be effectively earthed. Maximum permissible earthing resistance is as follows:

Device Use	Maximum Earthing Resistance
230/240 V AC	100 Ω

# 2 Wiring

# 3 Testing

Press once button marked "T".  
 Toggle moves from "ON" to "OFF" position by itself and "Click" is heard.  
 If the devices do not switch off the supply, contact a "qualified electrician".  
 The devices must switch off the supply immediately and must then be switched on to restore the supply.  
 In the absence of any regulation, the test must be carried out once a month.  
 iC60H RCBO PoN must be disconnected before any dielectric test is carried out.

## ⚠️ ⚠️ DANGER

**HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH**  
 Test once a month each device by pressing the button marked "T".  
**Failure to follow these instructions will result in death or serious injury.**

## NOTICE

**HAZARD OF IMPROPER OPERATION**  
 Do not use Test Button to switch off iC60H RCBO PoN.  
**Failure to follow these instructions can result in equipment damage.**

# 4 Dismounting

## NOTICE

**HAZARD OF IMPROPER OPERATION**  
 iC60H RCBO PoN self-locking Clip should be unlocked before removal.  
**Failure to follow these instructions can result in equipment damage.**
